DATA SCIENCE | DATA ANALYSIS | DATA ANALYTICS | WEB ANALYTICS PROFESSIONAL

Entry-level Data Scientist with hands-on experience in Machine Learning, Exploratory Data Analysis (EDA), Statistical Analysis, and BI dashboarding using Python, SQL, and Power BI. Skilled at turning messy, real-world data into clear insights, models, and dashboards that support business decisions.

Brings 15+ years of professional experience across education, talent acquisition, and music as a freelance performer and recording artist, with strong communication, stakeholder management, and problem-solving skills—enabling clear translation of business problems into data solutions and storytelling that non-technical teams can understand.

TECHNICAL SKILLS

- **Data Science & ML:** EDA, Supervised and Unsupervised Learning, Predictive Modeling, Model Evaluation, Deployment basics
- **Programming & Analysis:** Python (Pandas, NumPy, Scikit-learn), SQL (MySQL, SQLAlchemy), Statistical Analysis, Data Cleaning, Feature Engineering
- **Visualization & BI:** Power BI (DAX, KPIs, Dashboards), Matplotlib, Seaborn, MS Excel
- **Web Analytics:** Google Analytics 4 (GA4), Google Tag Manager (GTM), Google Search Console, web traffic and user-behavior analysis, conversion funnels, campaign performance, UTM tracking, engagement and e-commerce metrics
- **Tools & Platforms:** Jupyter Notebook, Visual Studio Code, Git, GitHub, Google Sheets, GA4, GTM
- **Core Skills:** Data Storytelling, Analytical Thinking, Problem Solving, Communication, Stakeholder Management

END-TO-END DEPLOYMENT PROJECT

Hotel Booking System — End-to-End ML Deployment

Python, Scikit-learn, Deployment (Streamlit)

Built and deployed an end-to-end hotel booking prediction system that allows users or hotel staff to input booking details and receive predictions on whether a booking is likely to be canceled, helping hotels reduce last-minute cancellations and optimize room allocation.

- Performed EDA and feature engineering on hotel booking data to understand patterns behind cancellations and no-shows.

- Trained and evaluated machine learning models to predict booking cancellation probability and selected the best-performing model based on relevant metrics.
 - Wrapped the model in a web application (API + UI) so non-technical users can interact with it through a simple form.
 - Deployed the application via streamlit.
-

PROJECT EXPERIENCE

1. RISK & HEALTH ANALYTICS PROJECTS

Credit Card Fraud Detection (Machine Learning, Python)

Built a classification model to distinguish fraudulent from legitimate transactions, helping reduce financial risk and potential losses for financial institutions.

- Performed EDA to understand transaction patterns and class imbalance.
- Engineered features and applied resampling techniques to handle highly imbalanced data.
- Trained and evaluated models using metrics such as precision, recall, and ROC-AUC.

Heart Disease Prediction (Machine Learning, Python)

Developed a predictive model to estimate the likelihood of heart disease based on patient health indicators, supporting early screening and preventive healthcare decisions.

Breast Cancer Diagnosis (Machine Learning, Python)

Implemented a classifier to distinguish between benign and malignant tumors, improving diagnostic support and reducing manual workload for medical teams.

Diabetes Dataset Analysis (EDA, Python)

Explored patterns and risk factors in diabetes-related data, helping identify insights for preventive care and patient monitoring.

2. CUSTOMER, REVENUE & PRICING ANALYTICS

Retail Customer Revenue Prediction (Regression, Python)

Created a model to predict customer revenue, enabling businesses to target high-value customers and optimize marketing spend.

Used Car Price Prediction (Regression, Python)

Developed a model to predict used car prices, supporting more transparent pricing for buyers and sellers in the secondary car market.

California Housing Prediction & Analysis (Regression + EDA, Python)

Built a regression model to predict house prices and analyzed drivers of housing cost, supporting real estate decision-making.

Bike Sharing Demand Prediction (Regression, Python)

Forecasted bike rental demand based on time, weather, and seasonal trends to help operators optimize fleet size and availability.

3. BUSINESS PERFORMANCE & DASHBOARDING

Loan Prediction Analytics Dashboard (Power BI, Python)

Created an interactive dashboard to analyze loan applications and approval patterns, supporting credit risk teams in monitoring portfolio quality.

Retail Sales Performance Dashboard (Power BI)

Built a sales dashboard to track revenue, product performance, and regional trends, enabling data-driven decisions for retail management.

Spotify Dataset Analysis (Python)

Analyzed song and artist data to uncover trends in popularity, audio features, and user preferences, useful for playlist curation and marketing strategies.

Facebook Live Seller Analysis – Thailand (Python)

Studied Facebook Live seller data to understand audience engagement and sales performance, offering insights into digital commerce behavior.

4. GENERAL ANALYTICS & EDA PROJECTS

Auto Dataset Analysis | College Dataset Analysis | California Housing Analysis | Diabetes Dataset Analysis (Python)

Executed multiple EDA projects to extract insights from diverse datasets, practicing hypothesis generation, visualization, and data storytelling to inform decision-making across domains like education, housing, health, and automotive.

EDUCATION & CERTIFICATIONS

Diploma in Data Science

Vijai Robotics, Haldwani — Expected April 2026

- Coursework: Python, Machine Learning, Data Visualization, Statistics, Data Wrangling, SQL

Master of Computer Applications (MCA)

Sikkim Manipal University (SMU)

Trinity College London Music Qualifications

- Grade 7 Classical Guitar (Distinction), currently pursuing Grade 8
- Grade 6 Music Theory (Distinction), currently pursuing Grade 8

PROFESSIONAL EXPERIENCE

Data Science Faculty

VijAi Robotics, Haldwani — 1 year

- Taught Data Science concepts through structured, practical, hands-on training.
- Delivered instruction in Python, SQL, data analysis, machine learning, and data visualization.
- Guided learners in applying analytical concepts to practical datasets and projects.

Talent Acquisition Executive

WhiteHat Jr — 2020–2021 (1 year)

- Conducted end-to-end recruitment for teaching and operational roles, including sourcing, screening, interviewing, and coordinating offers.
- Built strong relationships with hiring managers to understand role requirements and stakeholder needs.
- Maintained candidate pipelines and improved hiring efficiency through structured evaluation and clear communication.

Corporate Trainer

HCL and other companies — Various engagements

- Delivered corporate training programs, developing clear instructional materials and engaging delivery for adult learners.

Western Music Teacher

Salwan Public School, Mayur Vihar, New Delhi — 2011–2012

GD Goenka, Karkardooma, New Delhi — 2014–2015

- Designed and delivered Western music curriculum, mentored students, and prepared them for performances and examinations.

Music Teacher

Kala Sangam Institute, Noida — 2005–2012

- Taught music to students of varying levels, focusing on technique, theory, and performance skills.

Freelance Performer & Recording Artist

Independent — 2005–present

- Bass guitarist for band “Trivim” (formed 2006); guest artist for bands “Vayu” and “Band India” since 2007; member of Sufi band “Raas” (2014–present).
- Provided background music for plays at National School of Drama.
- Served as Music Director for M.P. Government Radio Station project “Watan Ki Raah Par” (2012).
- Regular performer at student concerts at Delhi School of Music and participant in

2nd National Classical Guitar Competition (2009).

TRANSFERABLE STRENGTHS FROM PREVIOUS CAREER

- Strong foundation in Exploratory Data Analysis (EDA) and model building
- Ability to translate ambiguous business questions into clear analytical problems
- Excellent communication and stakeholder interaction from 15+ years in education, talent acquisition, and music
- Analytical and creative problem-solving mindset, with a focus on practical, real-world impact
- Presentation and storytelling skills developed through teaching, public performance, and corporate training

LANGUAGES

- English — Proficient
- Hindi — Native
- German — Elementary
